

CRUCIFORM CLAMP

Cruciform clamp – profile, bolted M8 with stainless steel separator, to connect rod to galvanized tape or circular conductor. In order to avoid stress corrosion of the clamp, use tape to isolate the clamp from the corrosive environment, i.e. the ground. Stress corrosion occurs in the case of synergy of two factors: the corrosive environment, i.e. the ground, and the constant stress force on the clamp plates caused by the twisted screws. Elimination of the corrosive environment prevents the occurrence of stress corrosion.

Cat. no.	Dimensions			Material
	rod St/Cu mm	tape mm	dwire/cable mm ²	
C1030495N	14.2; 16	≤ 40	28-78	stainless steel 2 mm, stainless steel bolts M8
C1030496N	17.2	≤ 40	28-78
